DETAILED ACTION

Claims 13-14 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 03/16/2010.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by JP 62-54162 or JP 3-168650, they are of record on 1449.

JP 62-54162 discloses a method of forming a copolymer by copolymerizing an alkylene di(meth) acrylate and an ester having either polymerizable vinyl or isopropyl groups and functional groups, and chemically modifying these functional groups with a fluorine containing compound such as fluoroalcohol (see claims 1-13, page 5, lower left col, line 5 to page 6, upper left col., line 4; page 8, lower left col., line 7 to page 12, lower right col., line 20).

JP 3-168650 discloses a method of esterifying a polymer having a acrylic acid and/or methacrylic acid as constituent components and containing a (meth) acrylate ester component by reacting with an alcohol such as trifluoroethanol (see claim 3, page

3, upper right col., lines 3-7; page 4, lower right col., line 2 to page 5, upper right col., line 14; lower right col., line 3 to page 6, upper left col, line 5).

Claims 2-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
